

RO Pure Water Filling Machine

Introduction

RO pure water filling machine is equipped with RO purification system. It can automatically complete washing, filling and capping. This barreled water filling machine is an ideal bottling equipment at present. It is broadly used in urban, industrial and mining enterprises and individual units. As a type of automatic water treatment equipment, it is well received for its seven stages effective filtration. The water quality is in accordance with national standards. Pukui is specialized in supplying RO pure water filling machines for customers. Our barreled water filling machines have been exported to USA, Canada, England, Australia, India, Russia, Mexico, South Africa, Hong Kong and Taiwan.

Characteristics

1. The RO water filling equipment features little abrasion and stable transferring. We can easily change barrels.
2. Special stainless steel design makes RO pure water filling machine be solid and durable. There is no touch between the screw and bottle mouth to avoid secondary pollution.
3. The electric system of this barreled water filling machine is of international brand and achieves national food sanitary standard.
4. High-speed large gravity flow valve ensures fast and accurate filling with no liquid dripping phenomenon.
5. Pukui pure water filling machines adopt advanced PLC control technology. The key electrical components are from famous company such as Mitsubishi, France

Schneider, OMRON, etc.

6. The RO barreled water filling machine uses 24-hour uninterrupted UV disinfection to guarantee water quality.

Operation and Maintenance Attentions

1. We need to know the source water quality and choose proper RO pure water filling machines with certain water production capacity.
2. Our company provides one year warranty for the broken parts. Customers can contact us via email or telephone for after sale service.

Packaging and Transportation

We package RO barreled water filling machines in carton for ordinary order. For bulk order, we use polywood cases for sea or air transportation.

Specifications of RO Pure Water Filling Machine

Item	Specification

Email: binjoke@yahoo.com

Dimension	1950 mm × 1014 mm × 1690 mm (W × D × H)
Material	stainless steel material
Water Production Capacity	1300 GPD (4920 L per day) to 3000 GPD (11350 L per day).
Main Parts	RO membrane, filter, stainless steel cabinet, system board, IC card payment system

Technical Parameters of RO Pure Water Filling Machine

Sub-Model	FP-01-1300	FP-01-1900	FP-01-2500	FP-01-3000
Production per Hour	200 L	300 L	400 L	472 L
Power Input	1.8 KW	2.53 KW	2.93 KW	3.63 KW
Current Input	8.2 A	11.5 A	13.3 A	16.5 A
Size of Filling Bottle	5-gal	5-gal	5-gal	5-gal
Filling Flow Rate	30 bottles/h (5gallon bottle)		30 bottles/h (5gallon bottle)	
Water Tank Capacity	220 L	220 L	220 L	220 L
Ozone Productivity	13 g/h	13 g/h	13 g/h	13 g/h
Air Pressure	0.6-0.7 MPa	0.6-0.7 MPa	0.6-0.7 MPa	0.6-0.7 MPa
